

## Arming businesses to combat modern cyber threats

From financially motivated ransomware outbreaks, to political hacktivism and espionage, cyber-attacks are now more commonplace and damaging than ever.

Having effective controls in place to tackle the latest persistent threat actors is essential but with budgets being squeezed and a global shortage of security professionals, this can be easier said than done.

Redscan's award-winning security services are designed to provide the vital assistance needed to make tangible improvements to your organisation's cyber security posture. From custom assessments and compliance audits, to proactive threat detection and incident response, our friendly experts can be trusted to deliver reliable solutions for wide-ranging needs.

## Our 'offensive' approach to cyber security

Successful defence requires a deep understanding of the latest threats. Redscan's extensive skills and experience in offensive security means our experts can be trusted to provide the insight needed to better protect your business.

### Assess

Through a range of custom security and ethical hacking assessments, we help you to understand and minimise your organisation's level of cyber risk plus address weaknesses before they can be exploited maliciously.

### Detect & Respond

With Managed Detection and Response, we proactively hunt for threats that evade your perimeter security and provide the incident response capabilities needed to respond swiftly and effectively.

### Comply

In order to ensure that your security policies and controls keep pace with evolving business and compliance needs, we help you devise, implement and maintain a robust cyber strategy.

## Benefits of our specialist services:

Leveraging experienced security experts, cutting-edge tools and latest threat intelligence, our range of cost-effective services are designed to:

- ✓ Assist with the development and implementation of cyber security strategy
- ✓ Pinpoint vulnerabilities using real-world attack techniques
- ✓ Proactively hunt for, detect and eliminate cyber threats
- ✓ Alleviate the heavy lifting of day-to-day security operations
- ✓ Deliver actionable intelligence to aid threat remediation and resource allocation
- ✓ Improve awareness of security amongst technical and non-technical personnel
- ✓ Provide help, support and advice when needed
- ✓ Save money compared to making in-house security investments

*"Our partnership with Redscan has been one of the most successful that we have ever undertaken"*

Lee Lambard  
IT Director, ICG PLC

*"If you want a solution where someone will look after you 24/7 and give you a very flexible, professional and agile service - you want Redscan"*

Mariusz Sznerch, Lead IT Infrastructure Architect  
Pizza Hut Restaurants

## Assess

### Vulnerability Assessment

Obtain the support needed to define, identify, classify and address core security weaknesses across your network environments.

### Penetration Testing

Utilise a CREST certified ethical hacker to uncover hidden weaknesses that can go undetected by automated assessments.

### Social Engineering

Assess the ability of your organisation's systems and personnel to detect and respond to a targeted phishing email attack.

### Red Team Operations

Challenge your organisation's resilience and capacity to respond to a full-scale cyber-attack simulation.

### Virtual CISO

Call upon an experienced security professional to assess cyber-risk plus implement the controls needed to achieve compliance standards.

## Detect & Respond

### ThreatDetect™ Managed Detection & Response

-Network MDR

-Endpoint EDR

Arm your business to respond swiftly and effectively to breaches. ThreatDetect integrates leading security professionals, advanced detection and deception technologies, and latest industry intelligence, to hunt for, identify and help remediate attacks that evade your defences.

## Comply

Receive the help needed to achieve compliance with a wide range of information security regulations and standards including:

- GDPR
- PCI DSS
- ISO 27001/2
- GPG13
- Cyber Essentials
- Cyber Essentials Plus

## Why we're the right choice for your cyber security needs

- + A team of experienced security experts qualified to world-class standards
- + Cost-effective, scalable solutions that remove the need for upfront investment in security resources
- + A deep understanding of how attackers operate
- + In-depth security analysis and advice that cuts through the complexity
- + A commitment to continuously enhance our services using the best technology and intelligence
- + Regular service reviews to support evolving security needs

*“Over 99% of customers are extremely satisfied with our service”*
